OBJECTIVE

Motivated Full Stack Developer with practical experience building end-to-end web applications using React.js, JavaScript, and backend integrations. Skilled in API development, database management, and version-controlled deployments. Seeking a Full Stack Developer role to build scalable, impactful products.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design
Backend:	REST API Integration, Firebase (BaaS), Database connectivity
Database:	MySQL, Firebase Firestore
Languages:	C++, Python, Java (basics)
Tools:	VS Code, IntelliJ IDEA, Git, GitHub, Netlify, Postman
Core CS:	OOP, DBMS, DSA, Computer Networks, ML (basics)

EXPERIENCE

Full Stack Web Developer Intern — Upflairs, Jaipur [Certificate]	Jul 2025 – Aug 2025
- Developed responsive web applications using HTML, CSS, JavaScript, and React.js. - Integrated third-party REST APIs and managed backend connectivity for dynamic features. - Used Firebase for real-time database and authentication services. - Collaborated using Git and GitHub for version control, code reviews, and deployment.	
Intern (Technical Documentation) — Supreme Cooling Systems [Certificate]	Apr 2025 – May 2025
- Created and edited technical drawings using AutoCAD software. - Maintained structured digital documentation of industrial processes.	

PROJECTS

Library Management System	Java, MySQL
- Developed a full-stack app to manage book records, student data, and issue/return operations. - Implemented CRUD operations with MySQL for persistent storage and retrieval. - Applied OOP principles with modular Java code for maintainability.	
Portfolio Website	React.js, JavaScript, CSS, Netlify
- Built and deployed a personal portfolio with modern UI, smooth scrolling, and full responsiveness. - Managed deployment pipeline via GitHub to Netlify with CI/CD.	
Sign Language Detection System	Python, OpenCV, TensorFlow, ML
- Designed an end-to-end ML pipeline for real-time sign language recognition from webcam input. - Integrated OpenCV for image capture and TensorFlow for gesture classification.	
Weed Detection System	Python, OpenCV, TensorFlow
- Built an ML-based system to detect weeds in agricultural fields using image processing. - Published research paper on the approach and findings.	

EDUCATION

B.Tech — Computer Science Engineering, MITRC, Alwar	Graduating Jun 2026
Senior Secondary (XII – CBSE) Adinath Public School, Alwar	2022

CERTIFICATIONS & ACHIEVEMENTS

- [Java Certification](#)
- [Python Certification](#)
- [Research Paper — Weed Detection System \(ML & Computer Vision\)](#)
- Created tech content with **20K+ views** across social media platforms.
- Mentored peers on programming, project development, and resume building.
